

For Immediate Release

National Datacomputer, Inc. Announces One-Stop Food and Beverage Solution with 3i Infotech

BILLERICA, Mass. Thursday, October 11, 2007-- National Datacomputer, Inc. (OTC Bulletin Board: IDCP - News) a leading provider of mobile computing solutions, announced today that the company has entered into a comprehensive partnership with 3i Infotech, a global provider of IT solutions and services. The partnership will result in a turnkey solution integrating 3i Infotech's Orion™ ERP system with National Datacomputer's RouteRider LE™ Direct Store Delivery system for companies in the Beverage, Baking, Coffee & Tea, Dairy, and Snack Food industries.

Under terms of the agreement, the companies will provide all software, hardware, professional services, training, and support for their flagship products and a new real-time interface. The interface will support a comprehensive 24 X 7 global view into all aspects of a customer's operation, allowing instantaneous adjustments to next day manufacture, warehouse, distribution, pricing, promotions, etc.

"We have worked with 3i Infotech on a complete RouteRider LE™ solution for a major mid-west bottler and are cooperating with them on several other new business opportunities in various Food and Beverage vertical markets. We believe that our customers will find Orion™ to be a very suitable and cost-effective solution for their back office operations, now made even more compelling with the new turn-key interface to RouteRider LE™" said William Berens President and CEO of National Datacomputer.

"National Datacomputer, with their full-featured Windows mobile solution and professional services staff, is a Route Accounting/Direct Store Delivery pioneer with a ton of experience in this industry. We have shared a strong working relationship that we are now formalizing to better serve our many common prospects", said Sharad Vajpayee, Vice President - Enterprise Solutions, 3i Infotech Inc. "We can now jointly scale our marketing efforts in order to give our audience the many benefits of this single integrated solution. Together the companies will partner to quickly solve many of the limitations that exist with second generation custom solutions which are being quickly outdated by competitive advances in supply chain operations, global business requirements, and advanced real-time mobile CRM solutions using internet, cellular, WIFI, and blue tooth communications."
